## FIRM/TONE

Sculpsure laser targets and heats fat cells under the skin without affecting the skin's surface. Sculpsure raises the temperature of fat cells damaging their structural integrity. Contact Cooling™ stays on throughout the treatment which keeps the skin safe and comfortable. The damaged fat cells are removed naturally from your body through the lymphatic system. Once the fat cells are removed from the body, they can not regrow.

**2 treatments per area** **\$1500**

Venus Legacy laser uses multi-polar radio-frequency and pulsed electro magnetic fields to produce heat under the skin's surface. These treatments help to naturally increase collagen and elastin fibers while also shrinking the volume of fat cells. The result is significantly reduced wrinkles and cellulite for more youthful skin. Perfect treatment for post plastic surgery.

**Series of 6 treatments for one area** **\$895**  
(Face, neck, arms, stomach, buttocks or thighs)
